Re: "Confidence in the judiciary is essential," he wrote in the press release. "Therefore, based on all the circumstances presented, the Court Executive Commission and Commissioner Rutledge have decided that for the benefit of the public, the bench and the parties involved that an administrative leave would be appropriate. (MH)"

Dear Honorable Stephen A. Sillman:

I write this letter to ask as to why you have not responded to even one letter, or taken any corrective or investigative action concerning the trial fixing and sabotaging of motions and manipulating of trial dates by Judge Duncan, Judge Robert O'Farrell, Judge Adrienne Grover, Mr. Dennis McCarthy, Mr. James Cook, Mr. Larry Lichtenegger, Fenton & Keller, the Horan Law Firm and Commissioner Richard Rutledge? That is the short list.

Commissioner Rutledge recently gave a verdict to Mr. Terry Spitz without having a hearing. If you check your records you will also see that Commissioner Rutledge gave a verdict to Mr. Bill Packwood who didn't show up for the trial. Judge Robert Moody later affirmed the decision. But you have already been presented all of the information and sat with your finger in your nose.

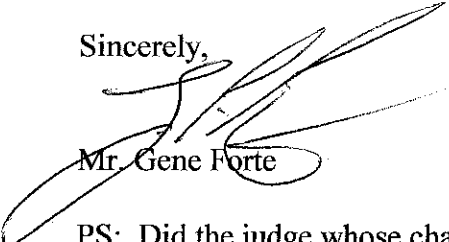

I (facetiously) can hardly wait to see you roll into action for the benefit of the public because as you say "confidence in the judiciary is essential". Sir, you are a very bad joke and the record will show it.

A copy of this is being provided to the reporters at the Monterey Herald so I can also jam it down their throats one day.

When I am finished exposing the outright corruption of the Monterey Superior Court bench with you as the head cheerleader at this time, you guys and gals are going to become the poster child for what is wrong in America today and be making license plates. It is only a matter of time.

By the way, I request an investigation and please respond if you are going to take any action.

Sincerely,

Mr. Gene Forte

PS: Did the judge whose chambers Commissioner Rutledge used rent it out or just get a freebie?
